

Heritage and Climate Change:

Mobilising for Climate Action

#ClimateHeritage

#ICOMOS

Across the globe, communities are transforming to address the causes and impacts of climate change. How can heritage help? What does the practice of cultural heritage look like when it's part of the solution?

This program explores these questions through the work of three colleagues on the frontlines of climate action, in Puerto Rico, Thailand, Fiji, and beyond to demonstrate how cultural heritage can drive and enable climate action.

FEATURING:

Asst. Prof. Dr. Witiya Pittungnapoo, Faculty of Architecture, Naresuan University (Phitsanulok, Thailand). PI of the Global Partnership Project on Climate Change Adaptation Strategies for Cultural Heritage Preservation: Sukhothai and Si Chatchanalai Parks. A Co-focal Point of Sukhothai UCCN for Crafts and Folk Art

Elia Nakoro, Manager Archaeology & Gazetting, Fiji Museum

Dr. Isabel Rivera-Collazo, Department of Anthropology, Scripps Institution of Oceanography, University of California San Diego

Moderated by Andrew Potts and Stacy Vallis,
