EDITOR'S COMMENT:

We published a paper by Richard Aitken in the last issue of Historic Environment. The last sentence referring to Victoria’s network of provincial botanic gardens was printed in error as text instead of as a caption.

Richard’s paper was originally delivered at the International Symposium on the conservation of Urban Parks and Squares, Montreal, 1993 and as he says it ‘was a mammoth event in the garden history calendar’ – anyone interested in acquiring the full proceedings can write to the Association des Architectes Paysagistes du Quebec.
